Notes and Findings:

- The [Counting for Dollars Project](#) will identify all federal financial assistance programs relying Decennial Census-derived data to guide the geographic distribution of funds.
- As an initial product, the project is publishing tables on the distribution, by state, of FY2015 funds from 16 large Census-guided programs.
- For every program but the National School Lunch Program, the equitable distribution of funds to a state depends on the accurate measurement of its population count and characteristics.
- There is not a straight linear relationship between state population count and federal funds flow. The per capita figure allows cross-state comparisons of fiscal reliance on census-guided programs. *It does not indicate the amount by which federal funding increases for each additional person counted.* (See The Leadership Conference Education Fund, "[Counting for Dollars: Why It Matters.](#)")

Definitions:

- Census-derived statistics – federal datasets that are extensions of or otherwise rely on the Decennial Census (list available on [project website](#))
- Census-guided financial assistance programs – programs that rely on Census-derived statistics to determine program eligibility and/or allocate funds to states and localities
- Per capita – total FY2015 obligations for the 16 programs divided by population as of July 1, 2015 (per the Census Bureau)
